
The DX Bulletin

ISSUE 106 SEPTEMBER 5, 1981

PROPAGATION: Sep 5, High/Above Normal; Sep 6, High/Low Normal; Sep 7, 8, High Normal; Sep 9, 10, High/Above Normal; Sep 11, Above Normal; Sep 12, High Normal; Sep 13, 14, Low Normal; Sep 15, High Normal; Sep 16, Above Normal; Sep 17, High Normal; Sep 18, High/Low Normal; Sep 19, Below Normal; Sep 20, Low Normal. TNX N4XX.

WELCOME BACK 28 MEGS

W1, 2, and 3 were treated to the first significant 10 Meter opening Sep 1, with the band opening to Asia for about two hours, 1700-1900Z. Among the gathered DX were YC3FM (and other Indonesians), CR9AN, DU1DPC, A4XJJ. 3B8AE/3B9 was thrown in for good measure.

This short path polar opening followed by a couple of weeks several false starts to the 1981 season on 10; some JA stations had been worked in mid-August on the 10 Meter long path, and Europeans were to be found, albeit weak. The last few days of August saw strong openings to southern Europe but, typically, weaker signals from northern Eu. On Sep 1, US West Coasters were getting through to EU; they did not seem to have the polar opening to Asia.

CROZET FB8W

All sources now indicating that F2CL will be stationed at the French weather station on bleak Crozet Island; he reportedly arrives mid-September but will not be on the ham bands until November (Geoff Watts Newssheet). A rig for him is desperately needed but it's probably too late to get anything to France in time. FB8W sneaked into the Top Ten most needed in the 1981 TDXB survey, placing #9.

SAN FELIX

Our word of last week (TDXB 105) re WB1GDQ/CEØ was correct...look for them to fire up from Juan Fernandez mid-Sep, then from San Felix the first of October.

MALPELO HKØ

Malpelo, #13 in the 1981 Survey, is expected to be activated in 1983...an IARU Region 2 conference is slated for late that year, and the Colombians hope to activate Malpelo in honor of the Western Hemisphere event. It is good to note that the planning is already underway, by HK3DEU, who is on the Region 2 Executive Committee. More on this admittedly far-away expedition as things develop.

Juan De Nova

FRØFLO/maritime mobile was heard Aug 30, supposedly enroute to Europa and then to Juan de Nova (TDXB 104, 105). Nothing heard of them by Sep 2, but their intentions were to be on the air from Juan de Nova sometime the first week of Sep.

JA2KLT had been rumored to be joining FRØFLO and FR7BP, if his visa application for Rodriguez did not come through...it obviously did, because he has been sharing the bands with 3B8AE/3B9 since Aug 27.

Look for callsigns FRØFLO/E on 'phone and FRØXRO/E on CW.

W9DXCC

Still time to make this Sep 12 activity, which now will include two last-minute guests...KP2A, John Ackley, of Desecheo and IDXF fame, and Dana Atchley, W1CF, who will make a presentation on 80 and 160 Meter DXing techniques (his first recommendation might be to move to the East Coast! - ed).

The DX Bulletin (ISSN 0279-8077) is published weekly for \$26 per year in the U.S., Canada and Mexico; all others \$35 per year. The DX Bulletin is published at 306 Vernon Ave., Vernon, CT 06066 Second-class postage paid at Vernon, CT. POSTMASTER: Send address changes to The DX Bulletin, 306 Vernon Ave., Vernon, CT 06066

Another group of hams going to China: Bob Hudson, K7LAY, member of ARRL's DX Advisory Committee, will be accompanied by three other members of the Boeing Amateur Radio Club this month. They are taking two radios to demonstrate amateur radio at several universities. There is no reason to believe they will be allowed to transmit.

A recent swing through southern Africa by Wayne Green, W2NSD, publisher of 73 magazine, included some hamming from Johannesburg, S.A., 7P8CA Lesotho, and W2NSD/3D6 Swaziland. Wayne was in the area on business, to establish African editions of a new magazine called Desktop Computing. An article will appear in 73 shortly, including how Wayne operated 2 Meters from a balloon from the outskirts of Johannesburg.

If you worked YA1CP in the recent All Asia CW contest, good luck. The operator said he was UD6DMO and to QSL via UK3A (sort of the Russian W1AW). Our friend who worked YA1CP says the contacts on either side of him were UD6DLJ and UK6FAA.

Jim Smith, VK9NS, writes with further info on Heard, mainly that he is still aiming for the narrow weather window around the end of December. Jim now has permission for his wife Kristi to accompany him to Heard. Meanwhile, you can look for the Smith team to be fired up from Western Samoa in a couple of weeks...Jim is 5WIDG and Kristi expects to get a callsign upon their arrival.

Fred Kleber, K9VV, operated most of the summer /CT1 from Portugal, where he was working for the Voice of America on transmitters there. Fred was using some vintage ham gear there and had mucho problems getting things working and keeping his signal out of the commercial gear. He's back in the states and returns to college in Illinois this month.

Rich Assarabowski, K1CC, due to arrive Warsaw Poland Sep 5, says "Thanks" to TDXB readers...our plea for slides of you and your stations resulted in Rich now having 500 35 mm slides in his pouch to show the Polish hams at their convention. He also has four movies, one of

the NØSS CW receiving contest tapes, and some ARRL training material. Rich reports his license status (S03CC or S09CC) is now in some doubt due to the political situation, so he may just get on the air from club station SP9KRT during and after the Sep 5 weekend.

Many have T3AF QSLs from the November 1980 operation led by JA7SGV; unfortunately, the cards say simply "Kiribati" and are NOT being accepted by the DXCC Desk. Others still not accepted are XZ5/9A, 1AØKM, and G3JKI/5A.

DJ6SI, now in Africa, has added XT2AW and TR8 to his itinerary (TDXB 104). He is uncertain of dates, lengths of stay.

Active contester George Moore, W9VL, is moving to Botswana this month for a two-year stay. He will be working to install a new VOA transmitter in the north-eastern part of the country, as well as doing some hamming as A22VL. George will be joined by Larry Smith, N4FD and WA4IYH in some of the upcoming contests, including ARRL's International DX Competition next March. Don't be surprised if George shows up from time to time at other African hotspots.

And K7CA, who's been back home in the States for several months, returns to Santiago Chile next February, just in time for the ARRL Competition. He'll be K7CA/CE3 again.

9Q5L's QSL manager K3FN (30 Lockwood Ln, W. Chester PA 19380) says 9Q5L is active most days 1800Z/21040 MHz.

HELP SPREAD THE WORD

The motto of the popular press is "Tell them what they want to hear."

The motto of quality press is "Tell them what they ought to hear."

- Jay Gourley in the Washington Monthly.

LETTERS

Tac Yonemura: I have visited Kaw Thoo
JA1BRK Lei, Karen-state, East

Burma, and have written an article for a
JA DX bulletin on the subject. The Karen
people in East Burma are not rebel forces.
They have their own government, own forces
for defense only, and they have no ambi-
tion to rule the whole country. The U.S.
Pentagon knows all about Karen-state.

XZ5A and XZ9A should count as a se-
parate DXCC country from Burma, since it
is under "different jurisdiction" from
Burma/Rangoon. ARRL has received word
from Rangoon that amateur radio trans-
mitting is illegal, thus XZ5A and XZ9A
must be illegal. This is the same thing
as saying if you enquire of Peking whether
BV2A/BV2B is legal, I am sure they would
say "No."

LETTERS

John Gilbert: "Departing from pre-
K9PQG vailing, traditional wis-
dom of only valuing a QSL card from a rare
country conditional upon League contenance,
I will appreciate my XZ5A card because it
validates to me a ham radio QSO with a ham
transmitting consistently and indisputably
for three months from within the political
boundaries of Burma as we know them.

"In evaluating the merits of San Plo's
QSL card for DXCC, will the ARRL consider
that it (we) may be witnessing a government
whose administration departs from official
policy by local or national custom or by
privilege? Also, how are other Burmese
radio services licensed, regionally or cen-
trally? If the League refuses credit to
XZ5A and XZ9A operations, a certain irony
will exist; hams who have Burma confirmed
can rest assured that they worked a U.S.
ham in the mid-60's who subsequently had his
DXCC application revoked! Lastly, if the
League discredits the XZ5A operation, it
would be required to deny San Plo's DXCC
application, assuming he would apply. Would
this gesture enhance international goodwill?"
