SPRATLY: Latest word from West Germany is still that the group (DJ3NG, DJ6SI, DJ4EI, and DF6FK) leaves Mar 30 for Spratly, expecting to begin operations April 7. How long they stay will depend on how long it takes them to get from Singapore to the Spratlys, by katamaran. Look for about three to four days. Callsigns are 1S1SI, 1S3NG, 1S4EI, and 1S6FK. CW QSLs to DJ6SI, SSB cards to DK9KD.

CHINA: BY8AA and BY1PK both continue to appear about three or four evenings a week, on 15 and 20 Meters CW starting about 0030Z. They are a very tough catch from the East Coast. QSL response has slowed; one local has waited eight weeks and still no BY8AA card. VE7BC was in Beijing last week, working CW on 14170 at 0100Z, listening for SSB on 14200 and up. This was supposedly a "training exercise."

EQUATORIAL GUINEA: the operation mentioned last week (by TR8JD) was really by F6BBJ; Jacky had been operating from TR8JD and hoped to go to 3C1 after that. Nothing heard from him as this is typed (3/30).

POLAND: club station SP3KEY said, on 20 Meters, that as many as 500 SP stations could be active for the annual SP DX Contest Apr 2/3, by special permission. About two dozen Polish DXers had a special dispensation to work Heard Island in February.

DAYTON HAMVENTION: coming Apr 29-May 1. This year the Southwest Ohio DX association sponsors DX activities. The club's new officers (K8MN, W8KKF, K8BA) will have on tap a BY1PK presentation by JALBK, K8CW with his Heard Island story, Eric Sjolund, SMØAGD with his latest Pacific trip report, and an ARRL DXAC presentation by W3AZD, N4MM (Board liaison) and WØSR (DXAC chairman). Your editor regrets not being able to attend this year, but we are having the DX forum taped for us and will have a full report the following week.

14.100 MHz BEACONS: the network is now two short of being complete, with the addition of OH2B. JA2IGY is due on the air in early April. There's no word on when the Madeira Island beacon might be activated. The order is 4U1UN, W6WX, KH6O, JA2IGY, 4X6TU, OH2B, (blank), and ZS6DN. OH2B is at the Helsinki Technical University in Espoo, managed by the Finnish Radio Amateur League (OH6GJ in charge).

BANGLADESH: JH1RNZ and friends entered Bangladesh on schedule the week before last, S21BG and S21DX licenses in hand, but they were unable to get their radio equipment through Customs.

BRIEFLY NOTED: 9Y4RD/STØ, with the U.N. in S. Sudan, likes 15 Meters, and sometimes checks into the 21.292 activity at 1900Z... K1BJ/3B8, may be on Reunion about the time you read this... W2NSD knows nothing about a 9M6BP... FOØJO (W6GO) and FOØOJ (K6HHD) made 8915 contacts from French Polynesia at the end of last October; QSLs are going into the mail at this time... FCC has extended the comment deadline on "no-code" licensing to June 28... on a related note, W8OK is in charge of an assault on the all-time CW copying record at the Dayton Hamvention; according to the W5YI Report, one Jerry B. Farrell, 55, WB7VKI, hopes to be there to break the 40-year standing record of T.L. McElroy (75.2 wpm). Farrell has already been clocked at over 70 wpm and he practices at 100 wpm!... W6QHS/3A and KA6HSM/3A will be active Apr 13-15 on 40 and 20 Meters... Try BV2B with W7PHO, 21345 @ 2330Z, Wed and Fridays... UK1PAC, on 20 Meters CW, is apparently Franz Josef Land... T42AMC is at the Havana Trade Fair, QSL to the Cuba bureau... ZL1AMO/Chatham plans to be on until about Apr 12.

The DX Bulletin (ISSN 0279-8077) is published weekly fifty times per year at the following rates: 48 contiguous states \$28 per year (\$35 per year optional first class mail); Canada, Mexico, Alaska, Hawaii, Puerto Rico, APO, and FPO boxes, \$35 per year; all others \$50 per year (airmail). The DX Bulletin is published at 306 Vernon Avenue, Vernon CT 06066. Second-class postage paid at Vernon, CT. POSTMASTER: Send address changes to The DX Bulletin, P.O. Box 873, Vernon, CT. 06066

YASME REPORT: KUWAIT, MARCH 17:

"This is a report on the YASME DX-Peditions to HZ1AB, Saudi Arabia, and 9K2QL, Kuwait. We (W6KG and W6QL) visited HZ1TA and HZ1TC in the capital city of Riyadh, which is a large, modern city. It is unusual in that it is not uncommon to see stores closed but many items that they sell left in front of the store unguarded. Also, stores can occasionally be found open with no attendant present. One reason for this is that the people are very religious, and also, if a thief is caught, his hand is cut off!

"We visited HZ1AB in Dharan, where there are thirty operators, and they agreed to allow us to operate the ARRL International DX Contest, CW, on Feb 19 and 20. We made 1500 QSOs, with four of the regular operators helping. QSLs for this period go to YASME.

"Next we went to Kuwait, where we were extremely fortunate to receive the special call 9K2QL. This is the first special call issued to visiting amateurs in a long time. The first few days we stayed at the Marriott Hotel, which is a ship in dock like the Queen Mary in California. The problem was the port holes could not be opened, so there was no way we could get the coax into the stateroom. We finally moved to one of the nearby chalets, where we convinced the manager that our 3-element beam would be a desirable addition to the swimming pool and garden area of his 5-star hotel! We made 6500 contacts in 125 countries from 9K2QL. We are now operating from Jordan, using Lloyd's JY8KG call. After that, home to California."

K4YT REPORT: BOMBAY, MARCH 8:

First stop was Turkey, where I could not get TA1SU (Istanbul) on the telephone. Washington cancelled my Ankara stop. In Baghdad, Iraq, K7ZZ is working seven days a week and has no plans to try to operate. Joe Lutz (TA3CW and W7LPF/DU2) is now in Baghdad, has his gear with him, and hopes to be able to operate eventually. He will be in Iraq two-and-a-half years. The current problem with issuing licenses to visitors is the war with Iran; word is that if the war ever stops YI9 calls might be issued to aliens.

I visited YI1BGD and met Kamal and Saad. Was not allowed to operate. Saad is in the military and an electronics engineer, and Kamal is in his last year of engineering school. After that, he'll have to go into the military.

In Pakistan, I operated briefly from AP2HM in the ARRL DX SSB Contest March 5; QSLs for that can go to my regular manager W2TK. After that I stayed with VU2YOU in Delhi, then planned on Sri Lanka and possibly 8Q7 through the end of March. Next stops are Thailand (no radio), 9V1VP, Indonesia, and VS5 (see Calendar -ed).

K5YY REPORT: LITTLE ROCK, late MARCH

My latest DXpedition, Number Ten since 1969, produced 11,110 contacts and brought my all-time total to about 85,000. I had set out to concentrate on CW and the Low Bands for the benefit of 5-Band DXCC chasers. The overall CW percentage was 43, with a high of 74 percent from 9V1VP. Contacts with the U.S. were 5820 out of the 11,110, including about six hundred on SSB in the ARRL Contest Mar 5/6. I managed 1500 contacts on 40 and 80 Meters, despite the very difficult conditions (many broadcast birdies and pirate stations in the area).

In East Malaysia, I was guest of honor at a Boy Scouts banquet, where I received a plaque of appreciation for bringing them some radio items, including a Butternut vertical and ARRL "WARC Kit." 9M6 has many licensed amateurs but only four with rigs; most are PTT employees who just got a license for the fun of it and have never operated.

My VS5YY license in Brunei will be the last issued to an outsider for the time being. I attended the first meeting of the new Brunei Radio Society at VS5HG's home. The club intends to conduct code and theory classes. VS5 has many active hams but the most active remain VS5HG and Moody, VS5MS. I did some antenna work for a couple of the Brunei hams, and left them with an increased interest in operating the Low Bands.

As for licensing in East Malaysia, although I was originally told there would be no ticket forthcoming, I got 9M6YY with help from several influential people.

Propagation to the States from the entire area (9M6, 9V1, VS5) is only about four hours a day: 0000-0200Z on 28/21 MHz, and 1200-1400Z on 80/40, plus a regular opening on 14 MHz at 1400-1500Z. Propagation is especially difficult from Singapore, especially on the Low Bands. 9V1VP had never heard any signals on 80 before, but I worked about fifty US stations on that band. Signals were down about four "S" units from the 80 Meter signals at VS5 and 9M6 to the North.

"This will be my last trip for some years to come, since I will be returning to active medical practice this summer. The last fourteen years (of DXpeditions) have been fun but very time-consuming." -- K5YY

MUSIC CORNER: If you are interested in contemporary music and/or audiophile techniques, you will want to get the new Pink Floyd album "The Final Cut." It uses a holographic recording technique and has the best depth and dynamic range this editor has heard in a "standard" recording. "Standard" meaning non-digital, non "original Master," and pressed in the U.S. In case you didn't know, records pressed in other countries, primarily Japan and Germany, have much less surface noise and are generally higher in quality than those pressed in the U.S.

BANDPASS: Call/Frequency/UTC (plus West, Central, East Coast report)/Date

"Have you seen my quad gate mixer?"
 Tom injected. (KN8Z).

"The QRN finally went away,"
 Tom said ecstatically.

"Where's my VU7 QSL?"
 Tom asked adamantly. (WB6RSE).

"If it comes, do you think that
 DXCC will accept it?"
 Tom asked searchingly. (WB6RSE)

"That TF is a honeypot,"
 Tom said icily. (W4GW).
