n/a	n/a	91	129	2/15	72	15	3

EQUATORIAL GUINEA: 3C1BC (WB4ZNH) AND 3C1YL (WN4FVU) came on the air Friday, Feb 14, and will be there for two weeks. They are operating from the sixth floor of an apartment building and have a good signal. No 40 Meter operation is planned. 80 Meters will be 3597, listening around 3802; their upper band limit is 3600. No mention of CW operation. QSL 3C1BC to K4PHE, 3C1YL to N4NX. There will be NO net or list operating by these stations.

CYPRUS: six updates to the list of ZC4 stations in Issue 275. ZC4GM says "RAF Episkopi" (in doubt) and a different card from ZC4CB says only "RAFARS, Famagusta" (also in doubt). ZC4HC's QSL says "RAFARS 292, Famagusta, while ZC4MT says only "Larnaca." ZC4RM was on Episkopi Base (good one). ZC4JK says "Near Limassol." We will run the complete, updated list, in another week or two. It is apparent that RAFARS stands for "Royal Air Force Amateur Radio Society."

DXCC NOTES: It could very well turn out that the DXCC Desk will decide to accept only ZC4 QSLs which clearly say either Akrotiri or Dhekelia, which are the names of the RAF bases. This will be decided before the starting date for submitting cards (July 1).

PS7ABT/S9 from October 24, 1984, has submitted documentation to Newington and will count for DXCC credit. Approximately 150 QSOs were made in about three hours on 15 and 20 SSB.

MARION ISLAND: there is a rumor that ZR6AOJ, scheduled to arrive on Marion Island later this month for a long assignment, may have flunked the required physical examination. No word of who the backup operator might be.

BOUVET: word relayed from ZD7CW is that LA4CG may still set foot on Bouvet, probably Feb 26 for around four hours. There is talk he'll operate on 14.020 and/or 14.320 starting at 2000Z.

ANDAMANS: a note from Japan says VU7MB was worked Feb 5 and said he was on the Andamans, which is contrary to earlier word that they ('MB and 'GV) were on the Lacadives. A source in India doubts that either is true.

CHINA: DU9RG is trying to produce BY5RA on Tuesdays and Saturdays, 14.226 at 2300Z; the sked was successful Feb 12 with some North Americans getting through. The new station at Fuzhou is BY5RF, which opened up Jan 4; they have gear for both HF and satellite work.

CAMBODIA: XU1SS was on again Feb 12, at 0010Z on 14.227, with a list operation. As we have reported, the Bantea Ampil village was evacuated Jan 8, but there is speculation that operator Kimsan and perhaps others have relocated to Khao-I-Dang refugee camp, which is the largest in Thailand.

Reports from Japan say that XU1SS was first heard after the Ampil evacuation on Feb 4, on 40 Meter CW. The operators were Mao Sovann and Kimsan. At that time, they said their location was Dang Rek camp.

XU1SS operator Vann, with his personalized cap, provided by U.S. amateurs.

Since the original radio and beam were lost to the Vietnamese when Ampil was overrun, Japan's "DX Family Foundation" has sent an IC-730 and 40/20 dipole to Dang Rek, via Thailand. The rig being used on Feb 4 was probably commercial gear.

AFGHANISTAN: It has now been five years since the U.S.S.R. invaded Afghanistan, and their control is spreading. Most of the progressive academics from Kabul University are imprisoned or have fled to Pakistan. Tens of thousands of young people are being sent to Russia for "education."

A number of stations have been reported operating, most recently UA900/YA6 (worked in Europe). Some of these may actually be for real. If the Soviets authorize their invasionary force personnel to operate amateur radio, it will be interesting to see what position ARRL takes on granting DXCC credit.

It should be noted that most of the Afghani population near the border are Turkmen, Uzbeks, and Tadzhiks. Future amateur operation may well come from these areas; the Russians' control is weakest there, where the people, like their cousins in UH, UI, UJ, and UM, owe their allegiance more to ancestry than to whatever central government claims them at the moment.

For now, the Russians in Afghanistan are mostly soldiers and a few agricultural specialists, so the likelihood of technical-types opening up on the ham bands is remote.

CURRENT SUBSCRIPTION RATES FOR 50 ISSUES

FIRST CLASS MAIL TO U.S., CANADA, MEXICO: \$35

NEWSPAPER RATE MAIL TO LOWER 48 STATES ONLY: \$28

OVERSEAS AIRMAIL: \$50 (U.S. FUNDS)

The DX Bulletin is published at Burnap Brook Road, Andover, CT 06232. Second-class postage paid at Andover, CT. POSTMASTER: Send address changes to The DX Bulletin, Andover, CT 06232.

BRIEF NOTES

FCC has proposed two changes to the amateur (volunteer) examination procedures: rescinding the 30-day waiting period before re-taking an exam, and requiring public announcement only for exam sessions for five or more people.

Advance announcement has been made of the 1985 33rd Annual Pacific Northwest DX Convention, which will be held July 27 and 28 in Richmond, B.C., Canada. Further details available from VE7BXG or VE7AHA.

9U5JB Burundi says he'll be on all bands for the ARRL Phone Competition, operating 40 (7078) starting at 0000Z for several hours, then moving to 3773, listening on 3778.

4K1F and CE9AP both reported from S. Shetlands. ZX0ECF is on King George Island, Antarctica, by PY1AFP and PY1AFQ.

QUOTE from the bulletin of the Western Washington DX Club: "East of the Rockies they get to work that really fabulous 75/80 Meter DX like G, CT, EI, and F. But all that (we) can finagle is the usual BY, JA, JD, JT, KH2, VS6, VU, YB, and 9M2. You know, the EASY stuff." (How about some reports of that "easy stuff" for TDXB -ed).

Looks like 3B9CD will be on Rodrigues until the end of June; he's working at the weather station. A recent storm blew down his 14AVQ and 160 Meter antenna, but they're up again now. He uses generator power, which causes a lot of noise on the low bands.

VE3FXT's expedition goal of operating from 100 countries, announced here a year or so ago, was side-tracked by unfortunate family circumstances. George is now traveling again, in Africa, and said to be hoping to operate from Lesotho, S. Africa, Uganda, and Botswana.

A reader in Washington got a Christmas present he regretted...a Sears "touch-on" lamp which, it turns out, generates RF noise even when the main switch is turned off. The manufacturer's literature does say that the device causes QRN. You can quiet the thing down when not using it by installing an additional main power switch. Or you can take the entire unit to the local dump. We thought there were laws against this sort of device (?).

W3HNK can reportedly help with QSLs from many U.S.S.R. stations; send your request, along with one dollar and a large SASE with the Soviet callsign on the SASE. Joe can help with the following: any station in Leningrad; UK2FAA, UK2FAM, UA2FBZ, UA2EC; most UB, UC, UD; UF6CR and UF6RB; UG6LQ and UG6GAH; UH8BO, UH8DC, UH8EAA, UH8EAS, UH8HBM, and UK8AAA; UI8s AEE, BI, FAI, GAG, OAA, ZAC; most UJ, most UM, and most Franz Josef Land.

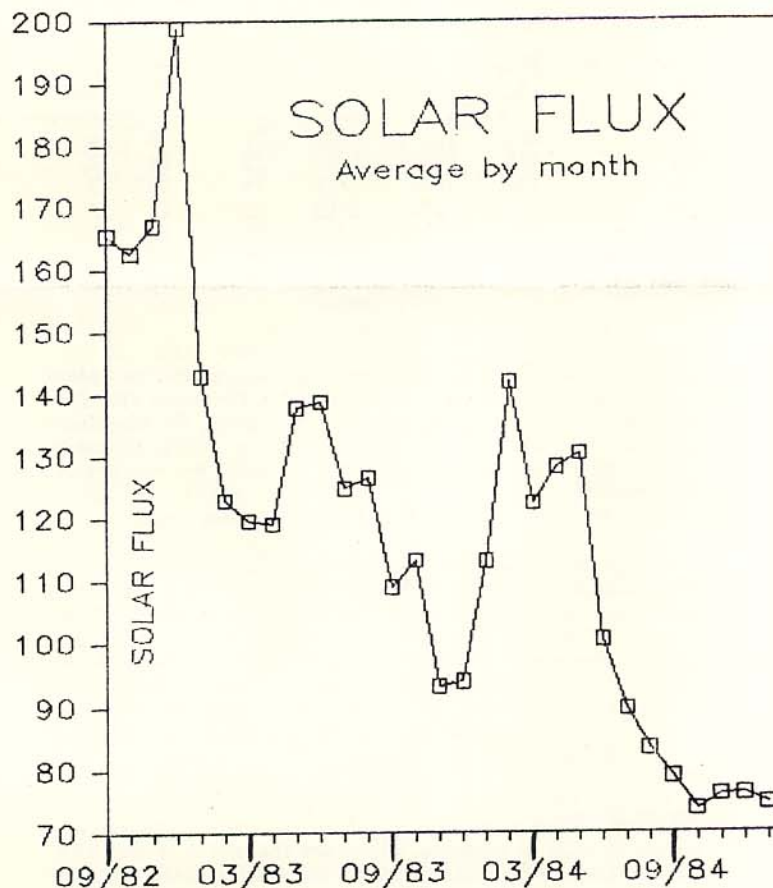

Please send us the frequency of your local 2-Meter or other VHF DXers gathering spot (if you haven't already)...we want to publish the complete U.S./Canada list by Spring. We have heard from about a dozen metropolitan areas so far.

And a reminder...overseas airmail now costs 44 cents for a half-ounce. And the new U.S. "D" stamps, for 22-cent first class letters, are NOT usable for foreign mail. There is no 44-cent airmail stamp available yet.

Thanks to KA1BU for this chart, which is graphic in the true sense of the word. You can make these from the solar flux data published on page one every week. Monthly averaging is a real picture of what's happening, since it smooths out anomalies in the flux (such as the first week of February two years ago).

FIVE YEARS AGO IN THE DX BULLETIN

(FEBRUARY 25, 1980): We reported that one FCC monitoring station had issued some 200 notices to amateurs heard not giving the callsign of the station they were working during the ARRL International DX Competition. This was a good example of the government's left hand not knowing what the right was doing, as FCC had in the works a Notice of Proposed Rulemaking which would eliminate the requirement of giving the other station's callsign.

The ARRL CW Contest that weekend had been affected by a solar flare (just as this year); we noted that for the first two hours of the morning opening on 10 Meters, Europe was workable from the Northeast states only on the long path!

Jay and Jan O'Brien had just taken over WB0MSZ's QSL manager list, and they are still at it five years later.

Jim Smith had arranged for a boat going to Heard Island to have radio gear aboard...the callsign would be VK0RM. Unfortunately, the operator was not a ham and he promptly proceeded to melt the output transistors in the TS430S. More next week...
