CLIPPERTON. FOOXX came on the air Saturday, April 6, at about 2200Z. The boat had stayed off shore several days as the crew waited for seas to calm for a landing. They will stay until about April 11, signing FOOXX on all bands with as many as six stations in operation at once. The operation commenced during a period of very poor propagation but conditons were expected to improve mid-week. QSLs to YASME.

 $\frac{\text{NAVASSA}}{\text{was }6\text{Y}5\text{N}}$ came on as scheduled April 3, and the callsign was 6Y5N R/KP1 only; no others. The CW operator has been working about 40 wpm and signing his callsign every ten minutes or so. QSL to 6Y5NR.

CAMBODIA came on the air again Mar 24, according to VS6CT, who heard XUISS. It is not known if the station is on from one of the actual Cambodian camps or rather from across the border in Thailand.

UGANDA operation by DJ6SI and DJ5RT has ended; <u>DXPress</u> reported that DJ6SI had three licenses in hand in Germany, one each for him, DJ5RT, and 5X5GK, all back dated to October 22, 1984, and good for one year. QSLs go to DJ5RT for 5X5GK and 5X5WR, and to DJ6SI for 5X5BD. They are looking for donations for 5X5GK's hospital operation in Uganda. The rumored Benin TY operation by DJ6SI did not materialize.

BURMA: although other publications are mentioning that a Czechoslovakian says he will operate from Rangoon soon, the situation in Burma regarding licensing has not changed. The government does <u>not</u> recognize amateur radio and does not issue licenses. Thus, specific callsigns would not be possible. Operations from Burma the past few years have been "/XZ" with the government looking the other way. The Newington DXCC desk recognizes <u>none</u> of these operations.

CHINA: was worked in Massachusetts Mar 29, as BY5RA appeared on 20 CW on a rare morning polar path opening, at 1140Z. This is typical of the kinds of openings which occur tor near the bottom of the sunspot cycle. The presence, or beence, of JA stations on the band do not necessarily indicate a possible opening to China.

SAN FELIX: the DXCC Honor Roll deadline has passed (Mar 28) with many DXers still not having received their CEOAA QSLs. It seems that an inordinate number of DXers were "one short" of Honor Roll status this year, and now face a wait of a full year for the next submission date.

HEARD ISLAND DX ASSOCIATION newsletter has been received by members of the association. Jim Smith, P29JS, has been joined on Papua New Guinea by his wife Kirsti, who is signing P29KJ, and they got the newsletter in the mail last week. The association has no immediate plans for expeditions, in part because the demand for DXCC countries in the Pacific and Antarctic regions has been mostly satisfied the past few years. One exception is South Sandwich, which is a difficult proposition.

Chod Harris, VP2ML, operating from "The Last Resort" on Montserrat. The cottage is radio-equipped and available to rent for vacationing and DXing. Details on rental and amateur radio licensing are available from Chod Harris, Box 4881, Santa Rosa, CA 95402.

ALBANIA will certainly top our annual Survey list again this year. Ecuadorian radio station HCJB recently aired a summary of the Albania amateur radio situation, most of the information coming from an October, 1984, article in the "Australian DX News.". According to their report, only three operations have occured from Albania since WW 2, both in the early 1970's.

OH2BH/ZA in July, 1970, aimed for ten days, but he was forced to shut down after only eight hours and 860 contacts. The official reason given was that he was causing interference to the hotel's internal communications system. Martti did have the paperwork necessary for DXCC, however.

In September, 1970, an operation took place which has been shrouded in mystery ever since. DL7FT and some friends got on the air as ZA2RPS, from the same hotel as OH2BH, and they worked about 1000 stations in four days.

In June, 1971, the same German group once again signed ZA2RPS, and made 2500 contacts in eleven days. Later, the Albanian authorities began denying all requests for operating permits, claiming that they had no knowledge of the September, 1970 operation and, further, accusing DL7FT of entering the country without claiming his radio gear at Customs.

In July, 1971, according to the <u>DX News Sheet</u>, OH2BH entered Albania once again, but a misunderstanding about declarations of radio equipment brought about diplomatic problems, and Martti and his friends went home without ever getting on the air.

Since then, according to the HCJB broadcast, some 25 amateurs from various countries, mostly Europeans, have been turned down for ZA operating permission. The authorities are quoted as saying that "as of January, 1975, amateur radio licenses are only granted to residents of Albania." Since private possession of transmitters is banned, the matter seems closed.

As reported in <u>TDXB</u> over the last several years, OH2BH and friends have continued their efforts, by donating transceivers to schools in the Tirana area and personally training prospective Albanian operators. It had been hoped that the opening of amateur radio in China would spur the Albanians to speed up their own amateur radio program but so far that has not happened.

Five years ago in The DX Bulletin

(April 17, 1980): DK9KD advised that a German group was on its way to the Indian Ocean, hoping to operate from Mayotte, Glorioso, and the Comoroes. In the wake of the failure of the Heard Island landing, P29JS announced the formation of the Heard Island DX Association, to drum up support for a major operation. In return for contributions, Jim Smith offered to begin the legwork necessary to land an amateur radio team on Heard along with the next scientific expedition.

The Northern California DX Foundation had shipped an antenna to Khartoum, Sudan, for use at a station at a "Youth Palace" there. Later activity occured, as 6T1YP, by visiting Finnish operators.

PROPAGATION

Another new crop of readers have been asking for an explanation of the propagation predictions by N4XX on page 1 Our recommendation is to purchase The Shortwave Propagation Handbook by N4XX and W3ASK; no DXer should be without a copy. In-depth analysis of solar conditions is also available in a newsletter from KH6BZF.

The predictions in $\overline{\text{TDXB}}$ are based on the sunspot cycle, the season, and what happened 28 days ago. Since we are just entering the lowest period of Sunspot Cycle 21, and will be in that period for about two years, "High Normal" does not now mean what it did during other periods of the cycle. Similarly, High Normal in April is not the same as High Normal will be in, say, July of any given year.

It has often been pointed out that during sunspot minimums, there will be a few good propagation days along with a lot of bad ones. The predictions help determine which days are liklely to be good, and bad. But the predictions can often be off by a day or two.

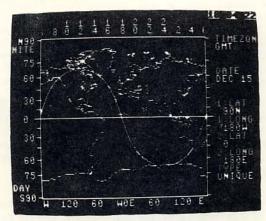

An interesting exercise is to scan the Bandpass section for dates which showed a lot of DX, then go back an issue to see what the prediction was for that day, and check the TDXB chart to see what the solar flux, A and K numbers (geomagnetic activity) were for that day. The correlation is usually very striking.

COMPUTERIZED "DX EDGE" ANNOUNCED

Xantek, Inc., is now offering a computerized version of the popular DX Edge. It is available only for the Commodore 64 computer, and it offers a graphic presentation on screen, with a world map showing Gray Line, sunrise and sunset times, and areas of light and darkness.

The com puterized DX Edge can automatically move the Gray Line across the map in real time, change the position of the map to put any spot in the world in the center of the screen, and more.

Ads for the DX Edge can be seen in most recent issues of the "major magazines."

CONTEST

CONTEST VATICAN CQ WPX CW May 25/26 Rumored by I5FLN, I8AA end of June

MARITIME MOBILE violations are the subject of a lett being circulated by KV4FZ, who claims that unlicensed yachtsmen are using amateur radio to avoid international telephone charges from their various harbor bases. The operators can be found mostly on nets on 14.313 and 21.390, often, according to KV4FZ, soliciting help from unsuspecting amateurs. The letter also claims that some amateurs have been financially compensated for their assistance to the "boat people."
