142	174	214	138	90	8/7	77	5	2

BURMA: OK3JW is reported saying that OK2BKH is indeed in Burma but says it is impossible to get written permission to operate; other reports are saying that the wife of 1Z9B (in the Karen state) was killed in fighting there.

The June listing of IARU member societies (available for an SASE from ARRL) lists Burma as one of the countries in which amateur radio is suspended; the others listed are Angola, Ghana, and Mozambique. Of course, many of the countries most needed by DXCCers are not even IARU members...Albania, both Yemens, Viet Nam, Cambodia, Laos; none are members. Bangladesh is, but lists no operators or stations, just 30 "society members." China lists 60 operators, nine stations, and 500 society members.

There are now 123 IARU member societies, the most recent additions being the Kuwait ARS and the Brunei ARTS. The only society on the agenda to be voted on next is Gabon (TR8).

"BOWDOIN TO BE ON THE AIR AGAIN"

N2PB/MM is operating from the schooner Bowdoin Aug 14-19, to commemorate the 60th anniversary of the first use of short wave radio from the Arctic. Look for them on 20, 40, and 80 phone and CW. The operation is sponsored by the Schooner Bowdoin Association, PO Box 1117, Rockland, ME 04841, and that's the QSL address.

On June 23, 1923, the MacMillan Arctic Expedition sailed from Wiscasset, Maine, with a complete 200-Meter amateur station on board; the operator was Don Mix, 1TS. Mix signed WNP (Wireless North Pole), and when he returned in September, 1924, the frequencies below 200 Meters had "been discovered." (Historical information from ARRL's 200 Meters and Down, by Clinton B. DeSoto).

PDR YEMEN (70): Europeans report working a "702PP" but QSL manager given (WB01D0) isn't in the Callbook. QRZ DX promulgates rumors that one ON8HB will be there for six months...but he is not listed in the current Belgian call directory. When Eastern bloc amateurs can't get permission to operate from South Yemen (not even Russians) it is difficult to figure how a Westerner could. Belgium is the biggest military arms peddler in Western Europe but S. Yemen is probably too poor to buy arms from anyone but the Soviets.

HAM IN SPACE

TONY ENGLAND, WOORE, shown aboard the Shuttle Challenger last week. He's taking a break from hamming to have a "new Coke." (Associated Press photo).

MT ATHOS DOINGS

Manos G. Darkadakis, SV1IW, writes regarding the recent purported Mt. Athos operations, "protesting strongly against a second violation of the reciprocal agreements between Greece and West Germany."

SV1IW referred to the claim by DL7FT that he was operating from Mt. Athos, and he stated (heard by many on the air) that "nobody has obtained a license (for Mt. Athos) the last ten years."

Darkadakis is circulating a photocopy of his license for Mt. Athos, issued in 1980. He points out that getting permission for a Mt. Athos operation from the Greek PTT is easy, but that such a license is conditional, requiring written permission from the Mt. Athos monks themselves.

All this simply adds to the doubts we have had for years regarding claims by DL7FT that he is "on the verge" of operating from Albania. To put it bluntly, his credibility is non-existent as far as we are concerned.

NOTES

QSLs for S92LB are starting to arrive, but don't send them to Newington until the DXCC Desk gives the go-ahead...WB2CVL will have his ZK1XK and FOORWP QSLs printed in about a month...BY1QH has proven to be a very fast QSLer, and one of the operators said on the air that dollar bills for postage are OK...Lots of grousing about the ARRL-proposed band plan for 160 Meters; the sticking point is that there is no CW/phone separation...more CE0AA QSLs arriving, but still no pattern has emerged...info on 5U7AW is the QSL manager was (is?) VE2DCY...rumors of an Angola operation published elsewhere are unrealistic considering IARU has been informed that amateur radio is suspended there; when IARU has this sort of official word from a government, it means that DXCC credit is automatically not given; that's why XZ5A, etc. don't count

...WB5HNZ reports he will be ZF2II Aug 17-24, QSL to his home address...QRZ DX says there will be a Heard Island expedition in September; that's the dead of winter there and we are certain that landings are impossible at that time of year...FW8AF is still on, having been expected to leave Wallis at the end of July...

...and T32AB, Lamar, has returned to Christmas Island with no current intention to relocate elsewhere...submissions for the annual DXCC list must be in by September; if you are still confused about the Cyprus/RAF situation, please see the detailed instructions in TDXB Issue 288, May 24, 1985.
