ISSUE 320 JANUARY 24, 1986

PROPAGATION: Jan 23, Low Normal; Jan 24, Disturbed; Jan 25, High Normal; Jan 26, Disturbed; Jan 27, Low Normal; Jan 28, Below Normal; Jan 29, Low Normal; Jan 31-Feb 3, High Normal. TNX N4XX.

Flux (81)	Flux (82)	Flux (83)	Flux (84)	Flux (85)	Date	Flux ----1986----	A	K
159	135	142	106	75	1/10	75	12	3
166	141	144	99	77	1/11	74	4	1
162	137	140	100	78	1/12	74	10	1
164	132	140	105	91	1/13	77	12	1
159	135	142	106	87	1/14	79	10	2
155	141	146	103	88	1/15	78	10	0
158	152	145	101	85	1/16	83	10	1

"Through the first days of January the rising solar flux curve followed that for the previous solar rotation, except that the numbers were about three points lower. After the 5th the rise stopped, the flux holding at 75 or 74 daily. As of the 12th the flux was 9 points below the Dec. 15 figure. The principal hope for the week of Jan 12 was based on a 3-day plateau of 80 Dec. 15-17. Quiet sun levels are expected in late January" (Tilton/WIAW).

• BV0BG, led by Barry Goldwater, K7UGA, and Larry Kettlewell, W3HHG, made about 7,000 QSOs under very poor conditions, from two different station locations. Both were in downtown Taipei and suffered from high line noise. A correction to last week's Bandpass ... the BV0BG reported on 3505 on Jan 7 15 2300Z was a pirate; the BV0BG on 3795 on the 4th, reported from Colorado, apparently was legitimate. QSLs go to W3USS, the Dept. of State ARC.

• Word is slowly filtering in on S90AS, who is IT9AZS, a medical doctor traveling in Africa; Sao Tome was his first stop on a trip which will include Togo, the Congo, Benin, and perhaps Burkina Faso (formerly Upper Volta). He expects to be 5V7AS from Togo. QSL via his home IT9AZS address. (DX Press).

• Another publication says that KMR will be in Saigon Feb 3-21 and "will attempt to obtain a reciprocal license." Aside from the fact that the capital of Vietnam is now called Ho Chi Minh City and that the U.S. and Vietnam do not have diplomatic relations, there have been Americans there the past two months, searching (with permission) for Americans missing in action since the 1960s and 70s. We do not know KMR, nor if he is part of the American search team.

• The Jan. 16 ARRL Letter quotes a government paper on radio jamming, including 7100-7300. The paper says something we have all known for years, that there are "extensive jamming efforts by Eastern Bloc countries of shortwave radio stations around the world." The report found that there are "more than 80 separate shortwave jamming locations within the Soviet Union, Poland, Czechoslovakia, Bulgaria and Hungary." Monitoring stations in a number of Western countries contributed to the study by supplying more than 30,000 jamming observations to the U.S. research team.

• The Texas DX Society will activate both East and West Caroline Islands in February; Dennis Motschenbacher, KZ5M and his wife Holly, N5GTH will sign KC6DM and KC6HM from ECI (Ponape) Feb 9-15 and from Palau WCI (Republic of Palau) Feb. 16-23; most of the operating will be on CW with a TS-830 and a vertical and dipoles. Contesters in the ARRL CW DX Contest are advised to listen for "/EC" or "/WC" to determine from which island the pair are operating from. QSLs to KB5FU.

VQ9QM (W4QM) should be on another week, perhaps two; he must QRT at 1630Z daily to return to his boat because he has no accommodations on the island (Diego Garcia). He is operating from a military club station, which has an IC-745 with keying problems and no CW filter; the club does have a TH-6 at 100 feet. Dave should be on all bands, CW only, by the time you read this.

• W6KG and W6QL finished from Swaziland and 3D6QL on Jan 8, having made 6,500 contacts in 130 countries. They report having "organized a small, multi-nation two-vehicle convoy in Lesotho and (drove) to Swaziland." The group included Lloyd, Iris, 7P8DF (German), 7P8CM (British) and 7P8CI (Austria). The first satellite operation from Swaziland netted 400 contacts in 40 countries.

The Colvins report that when the group got to the 3D6 border, all were granted entry except the German, 7P8DF, as Germany has no immediate reciprocal visa agreement with Swaziland. He finally did get in, however.

Lloyd and Iris spent all of their spare time in Swaziland trying to get visas to enter Mozambique, C9, but without success. Still no word of where their next operation will be from.

EDITOR RESIGNS

Garry Hammond, VE3XN, has resigned as editor of Canada's Long Skip, and is replaced by John Sklepukowycz, VE3IPR.

NOTES

• K1LLN/VP2M will be on 20 phone and maybe 15, Feb 24 to Mar 1.

• DX Press confirms that FR7AI/T will be on Tromelin the entire month of February, concentrating on CW.

• We have seen no heard or worked reports but understand that JTOXC is active, by OK1XC, for a stay of several years; wants QSLs sent to the Czech bureau.

• 6 couples will operate from Grenada beginning Feb 13 and including both phone and CW weekends of the ARRL Contest; team leader is K4LTA. They have requested J38A for the contest weekends and will make special efforts on 160 Meters; QSL info later.

• The best address we can find for TT8CW is J. Calvo, 5-10-5 Shimomuguro, Muguro-Ku, Tokyo 153 Japan; this has worked for several readers.

• A correction: the Americans killed in a S. American plane crash early this month were on their way to S. Sandwich, not S. Georgia.

HEARD ISLAND ODYSSEY

by Kirsti Jenkins Smith, VK9NL

Heard Island, in the southern Indian Ocean, has been known for centuries as one of the world's most inhospitable places. It is mostly rock and ice, features a 2745 meter-high mountain, Big Ben, and has never been permanently inhabited. It has been used as a stopover point for whaling ships and as a scientific outpost for those interested in the study of penguins, seals, and certain plants found only on the island.

Heard Island has always counted for a DXCC country and at times has been the most needed among DXers trying to work them all. It has always been very difficult for radio amateurs to get obtain passage on ships going to Heard Island, as politics dictates that any spare slots on expeditions are awarded as political plums. Getting there privately is very expensive.

Jim Smith, VK9NS, spent two years in preparation for his group, the Heard Island DX Association, to sail to Heard. Once government permission was in hand, obtained by a promise to service the island's weather station, the remaining task was to find enough people to share the financial burden, as amateur radio operators around the world could not be counted to donate sufficient funds.

A lucky break for Smith was finding a group of Austrian mountaineers who wanted to scale Big Ben and who became part of the expedition. A couple of Australian scientists joined the group, along with another ham, Bob Walsh, WA8MOA.

At the same time, in mid 1982, the International DX Foundation was working to put amateur radio on the air from Heard. They had contacted a mountaineering group which was planning to sail to Heard and who found space for two radio amateurs. This could have spelled disaster for either or both amateur ventures, as it was likely that donations from around the world would be divided between the two.

The HIDXA eventually located a boat, the "S.S. Cheynes II," a 160-foot steam powered, oil burning freighter built in Norway in 1947. The Cheynes 2 unfortunately turned to be somewhat of a fuel-eater and the expedition ended by sailing, rather than steaming, for much of the return trip home to Australia.

Heard Island Odyssey is not written specifically for radio amateurs; when radio is discussed it is done mostly in layman's terms so as not to discourage non-ham readers. Amateur radio comprises a fairly small part of the 140-page book, although every part of the trip contributes to our understanding of what

was required to put VK0JS and VKONL on the air and into thousands of logbooks.

With two amateur radio operations on the island simultaneously, the obvious interference between stations occurred but seemed never to be a problem. The IDXF group got there first and had somewhat better accommodations. Both groups suffered from rather poor propagation, and many DXers made their only contact with either group on 40 Meters, for example.

The HIDXA expedition took 73 days from departure to return and produced some 20,000 contacts. Each member of the expedition contributed equally to the expedition's costs. The HIDXA claims, possibly with justification, that rumors about the trip and about the other group cost them both financially and psychologically. But by every criteria, the expedition was a success: radio propagation studies were done, the weather station was serviced, the mountaineers scaled Big Ben by a route never before even attempted, and the scientists gathered valuable data.

Heard Island Odyssey is a landmark amateur radio book, as it is the first one in many years to fully document a major DXpedition. In fact, it may be the only book about an expedition written in such depth. Generally, it is well-written and structured. It suffers slightly from sloppy editing in spots, mostly from switches between American and British English, and from the use of unfamiliar terms which are often not fully explained. But these are minor points.

The book's strength is that it is written for non-hams, and is about a part of the world, the Antarctic, which is increasingly of interest to people everywhere. The book is very strong in its discussion of the interactions of 25 people on a difficult voyage, and as much of the book is devoted to time spent on the water as on the island. The author, being Norwegian, obviously knows her sailing lore.

The book could have been expanded to include some chapters on the actual climb of Big Ben, and could have been more appealing to the scientific crowd by more in depth descriptions of the island's peculiar climate, wildlife, and of Big Ben itself.

But, then, this book really was written for us, and for anyone who worked the expedition three years ago, the anticipation of sailing along with the team and waiting for the moment when VK0JS comes on the air is high indeed. We think Heard Island Odyssey will find its way onto some library shelves, and that it should be a part of every DXer's collection. Profits from the sale of the book will go toward paying costs of the expedition which remain three years later.

Kirsti Jenkins-Smith has made a major contribution to amateur radio by documenting one of the most exciting DXpeditions ever. - K1TN

Heard Island Odyssey (148 pages, paper, with 22 black-and-white photos) is available by mail order for \$14.45 (including airmail postage) from HIDI-Y, P.O. Box 90, Norfolk Island, 2899, Australia.

- Ted, OD5LX, reportedly had his antennas destroyed when a shell hit his Beirut home; he is presently on 21 MHz only, using a ground plane with no radials.
- K2LE will be on from St. Kitts around the end of this month.
- QSL help: A9XCC try K4CG; VP8GQ from the 60s, try WA4JQS or G3PAG.
- W2ZZ/CT3 is on Madeira for a couple of months and he likes CW and 160 Meters.
- 3D2OG was SM6FYJ, Lars Gustafson, QSL to his Callbook address.

LATE WORD is that Stew Perry, W1BB, "Mr. 160 Meters," died the week of January 6 in a nursing home. We will have more information next week. -SK-
